Working with SPSS File

- 1. Download Sample SPSS Dataset Click to download dataset
- 2. Copy Paste Book SPSS Dataset in Project working
- 3. install.packages("haven", dep=TRUE)
- 4. Load haven package in R Studio
- 5. Read book SPSS dataset in R
- 6. View book SPSS dataset

Note Package download & installation is one time activity, once it got install in Laptop then we need ignore install.package statement

```
In []: # Install Packages
install.packages("haven", dep=TRUE)

In []: # Load Package in R
library(haven)

In []: # Read Book XML dataset in R (Excel File)
survey <- read_sav("survey.sav") #This is will convert data from SPSS to DataFrame

In []: # View book dataset
View(survey)

In []: # Print Dataset in Terminal
print(survey)

In []: # View the structure of book dataset
str(survey)

In []: # Quick Summary of Amazon Dataset
summary(survey)
```

survey is dataframe variable, so we can execute all the dataframe functions on book variable to get the summary, plot, frequncy, unique, split, subset, order...etc
