Working with SPSS File

1. Download Sample SPSS Dataset Click to download dataset
2. Copy Paste Book SPSS Dataset in C:/dataset/ foder
3. install.packages("haven", dep=TRUE)
4. Load haven package in R Studio
5. Read book SPSS dataset in R
6. View book SPSS dataset

Note Package download & installation is one time activity, once it got install in Laptop then we need ignore install.package statement

```
In [ ]:
# Install Packages
install.packages("haven", dep=TRUE)
```

```
In [ ]:
# Load Package in R
library(haven)
```

```
In [ ]:
# Read survey SPSS dataset in R (.sav File)
survey <- read_sav("C:/dataset/survey.sav")  #This is will convert data from SPSS to Da
```

```
In [ ]:
# View survey SPSS dataset
View(survey)
```

```
In [ ]:
# Print Dataset in Terminal
print(survey)
```

```
In [ ]:
# View the structure of survey SPSS dataset
str(survey)
```

```
In [ ]:
# Quick Summary of survey SPSS Dataset
summary(survey)
```

survey is dataframe variable, so we can execute all the dataframe functions on survey variable to get the summary, plot, frequncy, unique, split, subset, order...etc
